

Document Storage

Authors: Travis Shuler, Reed Stephens, Ali Tehranie, Mark Soehner

Problem Statement

UofSC students need a way to upload all of their documents to the same place and receive confirmation that it has been received.

Who is experiencing the problem?

UofSC students who need to upload a lot of documents and need to know if their documents have been received.

What is the Problem?

The university uses a variety of websites to upload essential documents and it is hard to keep track of what has been received by the university.

Where does the problem present itself?

The problem happens online when students are uploading essential documents to the UofSC websites.

Why does it matter?

Sometimes students are missing required documents in order to be counted as a student or to move onto campus. This becomes a stressful process especially when all the documents are in different locations and have no way of knowing when they have been received.
